Project Documentation: LifeFlow

Project Proposal

Project Title: LifeFlow – Smart Goal & Daily Life Tracker

Problem Solved:
Many people cannot track how they spend their daily time, fail to follow routines, and forget goals and habits.

Target Users:
Students, professionals, and anyone who wants to improve productivity and daily life management.

Main Features:
- Dashboard overview
- Goal management (daily, weekly, monthly)
- Task tracking
- Daily routine planner
- Habit tracker
- Analytics & reports

Why it is Useful:
It helps users stay organized, track progress, build habits, and improve productivity.

Technical Documentation

Technology Stack:
Frontend: HTML, CSS, JavaScript
Backend: Node.js, Express.js
Database: MySQL
Security: JWT, bcryptjs

Database Schema:
Tables: users, goals, goal_subtasks, tasks, habits, habit_checkins, routine_blocks

Setup Steps:
1. Clone project
2. Create MySQL database
3. Import SQL file
4. Configure DB
5. Run server (localhost:5000)

Features & User Guide

Users can:
- Create and manage goals
- Track daily tasks
- Plan routines
- Monitor habits
- View analytics reports

Code Walkthrough

Important Files:
- Server file (Node.js)
- Database connection file
- Frontend main JS file

Design Decisions:
1. Used JWT for authentication
2. Used MySQL relational database

Bug & Fix:
Bug: Database connection error
Fix: Correct DB configuration
